

# MOBILET®

improving sanitation • from pit to pit

"The peoples' toilet"  
Mobile and ready to use toilet for pit

**For Schools, Clinics, IDP, Refugee and Army Camps and other Institutions, Farms, Homes and Construction Sites.**

MOBILET is the most convenient and least expensive long term sanitation solution wherever pit toilets are suitable. It comprises of two major parts, a slab and a hut.

- Mobile and re-usable from pit to pit
- 20 years' expected lifespan
- Modular for 2 - 6 or more stances
- Lightweight - easy to transport and install
- Standard product
- Clean and hygienic - made from plastic
- No more abandoned latrines - saves money

Key benefits for all users are:-

- A simple "do-it-yourself" solution designed for quick and easy installation directly over a pit by one-self. However, a little masonry work may be required in most areas
- Re-usability - move both hut and slab from an old full pit to a new pit - hence the name MOBILET!
- Modular, several MOBILET stances can be installed together rapidly for schools and other institutions - See overleaf
- Also available - MOBILET-UR urinal for males, MOBILET-WR washroom for females and MOBILET-HC for the handicapped pupils and the elderly
- Lightweight and well ventilated for the hottest conditions
- Rotationally moulded using polyethylene stabilised against the harmful effects of sunlight to give an expected lifespan of 20 years.
- Outside of hut - white or any other lighter colour. Inside of hut and slab - black or other colour such as grey
- Squatting Slab and the Slab with Pedestal - can be purchased separately

So compared to traditional pit latrines, MOBILET is by far the best, least expensive and longer lasting sanitation solution!

## Masonry Pit Latrine

NO

- ⊗ Fixed - not mobile
- ⊗ Abandoned when pit is full - money lost and causes land shortage
- ⊗ Heavy - 2 tons - causes pit collapse
- ⊗ Skilled contractor needed - not a standard product
- ⊗ Smelly and dirty

## Corrugated G.I. Sheet Metal Pit Latrine

NO

- ⊗ Fixed - not mobile and rusts quickly
- ⊗ Abandoned when pit is full - money lost and causes land shortage
- ⊗ Concrete base heavy - causes pit collapse
- ⊗ Skilled contractor needed - not a standard product
- ⊗ Smelly and dirty
